ENVIRONMENTAL MONITORING SYSTEMS (EMS)

In today's world of digital technology ICT System's are an integral part of progress and the office environment. Reliability of these systems is often paramount to the smooth running of any business. When systems fail, technology shuts down, data may be lost, client records become inaccessible and workplaces are left disabled. This inevitably affects the profitability and productivity of many companies.

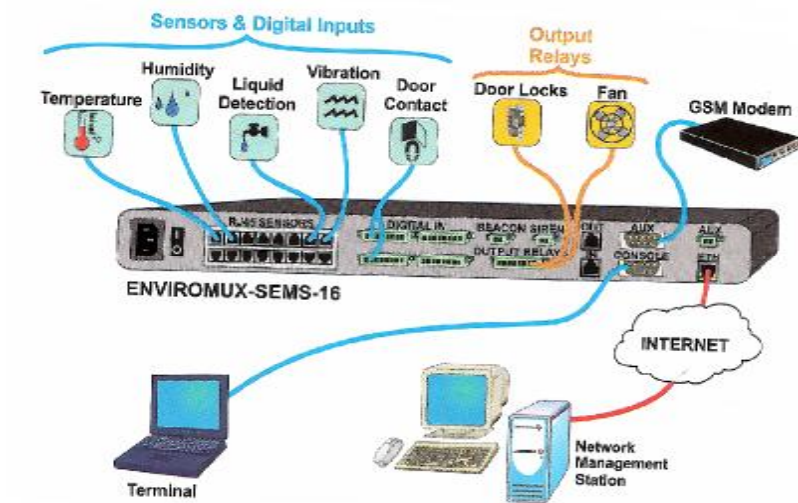

We use NTI (Network Technologies Incorporated) to deliver reliable and effective environmental monitoring systems that can give our clients peace of mind.

Trace Electrical offer unique packages to all of our customers.

EMS monitor critical environment conditions and can also provides all or a some of the following...

- Threat detection from, temperature, humidity, liquid water presence, motion, intrusion, smoke and vibration.
- The system can notify clients via email, LED's, alarms, web pages, network management and SMS messages.
- The system can support access control systems, video surveillance, glass breaking monitors, door locks and panic buttons.
- The systems also have an internal battery back-up so all systems continue to work even during power disruption.

Why employ Trace Electrical...

The short answer is for peace of mind and because reliable systems are advantageous to any business.

We use only the latest technology that is suitable for blue chip corporate companies and for smaller businesses. We are able to perform all installations outside of usual working hours, to minimize disruption to the client's businesses, at no extra cost.

By employing Trace Electrical you would let us do the hard work for you. We provide you with cost effective systems and an unsurpassable service.

Please look at our unique product information. We know you will not find equivalent or better.
