PLANNED PREVENTATIVE MAINTENANCE

Planned Preventative Maintenance is a schedule of planned maintenance actions designed to prevent the breakdown of electrical systems and their components before they occur.

Administered correctly PPM enhances the reliability and life expectancy of electrical systems and prevents costly system failures, by replacing worn out components before they cause damage.

Without a PPM schedule, costly unscheduled system breakdowns will occur that result in lost productivity and adversely affect profits. Without a PPM schedule the causes of such breakdowns are unknown and have to be traced adding to system down time.

Trace Electrical offer a unique package, at one price, to all of our customers.

Planned Preventative Maintenance is often neglected without obvious impact, because other financial pressures exist for many businesses. However all systems deteriorate if they are not properly maintained: in the same way that a car breaks down if it is not serviced, often causing more damage than would have occurred had a service been conducted.

The long term benefits of PPM include:

- Improved system reliability
- Decreased cost of replacement
- Decreased electrical system downtime.
- Better spares inventory management.

Why Employ Trace Electrical...

Trace Electrical are able to plan and maintain all of your complex electrical systems including, power, lighting, security, ICT infrastructures, CCTV, and access control in one contract. We are able to provide you with a cost effective, proficient and well designed maintenance support schedule that will prolong the life expectancy of your electrical systems and in the long term save you money.

Trace Electrical believe in perfection and as such we pride ourselves on being not just contractors but specialist service providers, that are constantly upto date with new regulations and trading standards.

By employing Trace Electrical you would let us do the hard work for you. We provide you with an unsurpassable service. You receive reliable, safe electrical systems that enhance your office performance capabilities.

Please look at our unique product information. We know you will not find equivalent or better.
